OWENTON, Owen ro., Ky., 27th, Dec., 1859.

Our Engine works up to any speed we desire: in fact we often have more power than we can use, and have to lear e the fire-door open when sawing dry timber. In sawing green poplar we use about half the slabs, but consume the other half in running our tirst Mill two days in the week. We make 30 bashels cornmeal per hour with a pair of Burriss' 36 inch burrs. You may think that fast, but it is true; and we run a flouring will at the same time, both coupled directly to the engine. * My mill is quite popular, not only as a saw, but grist mill, and I must give the Idandy Portable Steam Engine at bash halt the credit, for it works at all times Lake a Timbo of Life. We have had but very little trouble in keeping everything in order without the aid of a machinst or engineer. I had a man with me three days who had been used to a stationary engine. Since then a boy attends the engine, and does it well. As to my saw, we can cut just what we please—have cut at the rate of 1350 feet per hour. The saw never heats in any kind of timber. Lumber is in good domand, so that up to this time I cannot get a supply for myself.

and we shall see no more of them in this part of the country.

It is a settled point, and given up by all who have seen Blue Dick, that it is far ahead of any thing ever introduced into this part of the State. Blue Dick got Ibe first premium at the Fair of the North Kentucky Agricultural and Mechanical Association, last month, and was immensely popular with every body.

Since our farmers have seen Blue Dick bitched to a Thrashing Machine, they all want him next year, but he can't thrash them all in a week or two, so it's no use talking, I have got to have a mute for him. use talking, I have got to have a mate for him.

JAS. T. JOHNSTON.

* Our Mill is still doing fine, making very nice smooth lumber, and cotting all the logs we can get to and from it. It has deceived the old-hishioned mill men the worst of anything I ever saw. They can't see how it is that it has so much power and it so little. But they have to acknowledge that it out-cuts any mill they ever saw, big or little.
